

Software Requirements Specification (SRS)

AI Resume Analyzer Using MERN Stack & Groq AI

1. Introduction

The AI Resume Analyzer helps job seekers analyze resumes against job descriptions using AI. It generates ATS scores, identifies skill gaps, and provides improvement suggestions.

2. Scope

Features include authentication, resume upload, PDF/DOCX parsing, ATS scoring, AI recommendations, interview question generation, and dashboard analytics.

3. Technology Stack

Frontend: React.js, Tailwind CSS. Backend: Node.js, Express.js. Database: MongoDB Atlas. AI: Groq AI. Authentication: JWT.

4. Functional Requirements

User Registration, Login, Resume Upload, Resume Analysis, ATS Score Calculation, Skill Gap Detection, Resume History, Dashboard.

5. Non-Functional Requirements

Security, Performance, Reliability, Scalability, and Availability requirements.

6. Database Design

Collections: Users, Resumes, Analyses.

7. APIs

Authentication APIs, Resume APIs, Dashboard APIs.

8. Future Enhancements

LinkedIn Analysis, AI Resume Builder, Mock Interviews, Job Recommendations.
